

Welcome to Breece Cloud. This is a Userguide about using your new Breece Cloud ESL system.

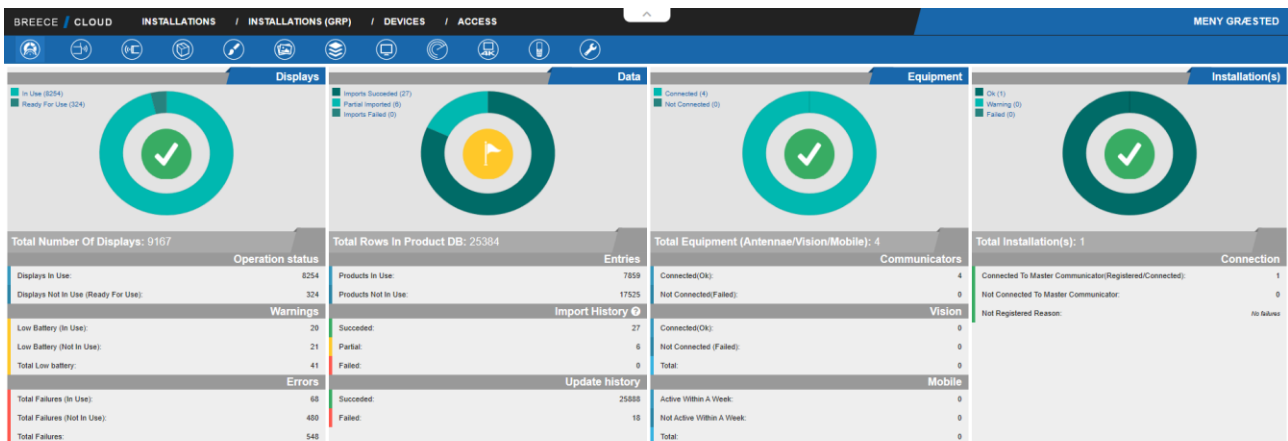

To Use the system you must open a Browser:

Username is: Store primary email.

Link to password generation will be send to the registered email.

Dashboard:

Navigation:

This Button is a shortcut to the installation Dashboard.

This Button is a shortcut to the antenna(s) on the installation.

This Button is a shortcut to the displays on the installation.

This Button is a shortcut to the product import.

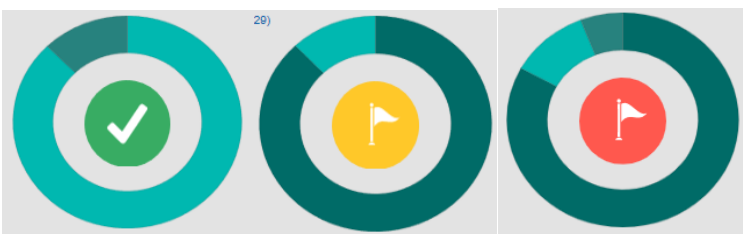

This Button is a shortcut to the display Queue

This Button is a shortcut to display positioning.

Dashboard:

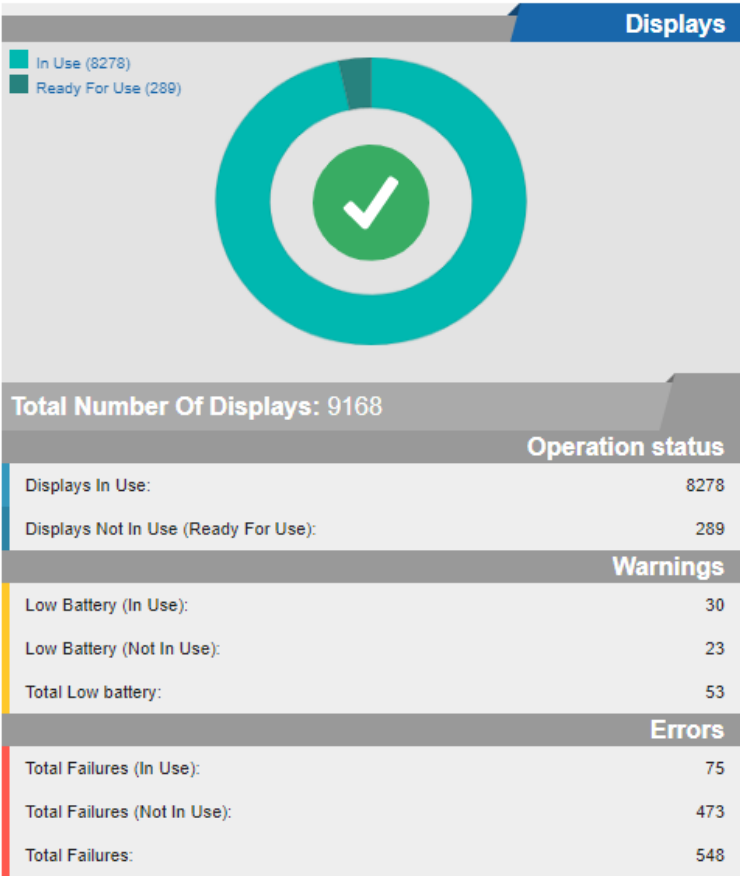

The Dashboard gives an overview of the installation and the System Operation. The Dashboard contains of 4 columns: **Displays** – **Data** – **Equipment** – **Installation(s)**

Green is good

Yellow is warning Red is Alert

Dashboard – Displays:

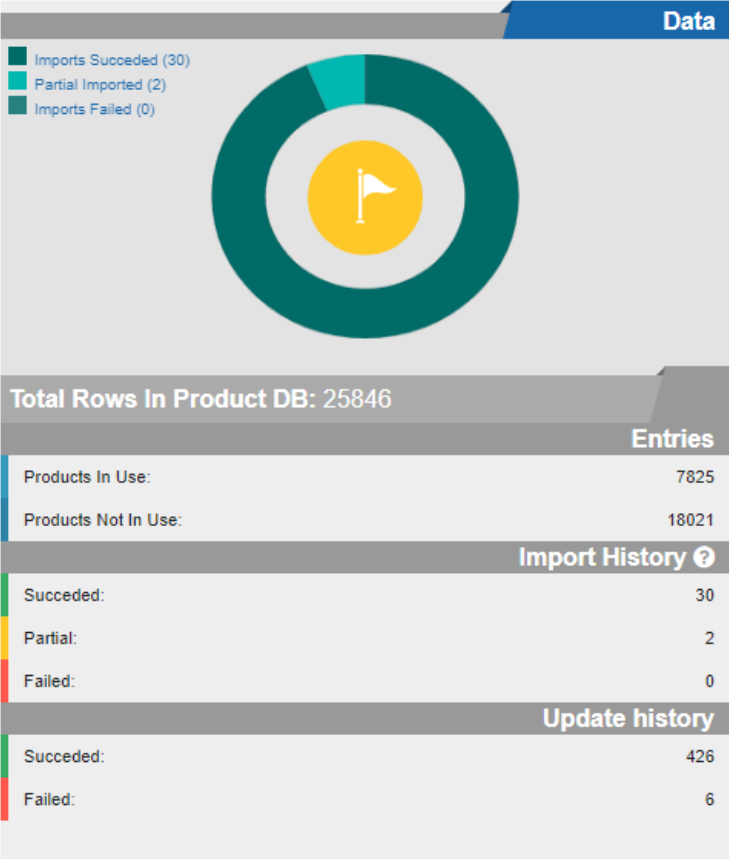

Under Displays at the Dashboard, it is possible to see the amount of displays in use and ready to use and a total number of displays on the installation.

Under Operation Status there are Warnings and Errors from the displays.

Each warning and Error is a link that reaches the displays in the warning or error to see which displays to handle.

Dashboard – Data:

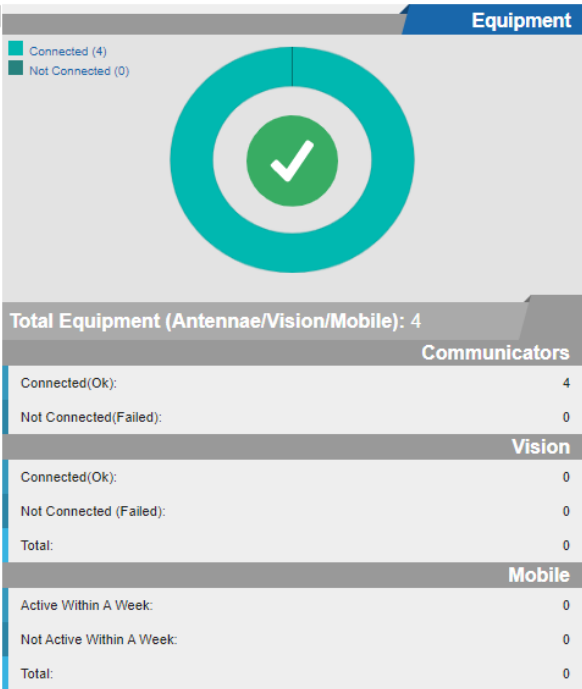

Under Data on the Dashboard it is possible to see the product import.

Entries:

- Total product import
- Products in use
- Products not in use
- Import history
- Succeeded are green
- Partial are yellow
- Failed are red

To see which imports are succeeded, partial succeeded or failed it is possible to follow the links to a summary of the respectively.

Dashboard – Equipment:

Total Equipment: The amount of antennas, Vision boxes and Mobiles.

Communicators:

Connected (OK)

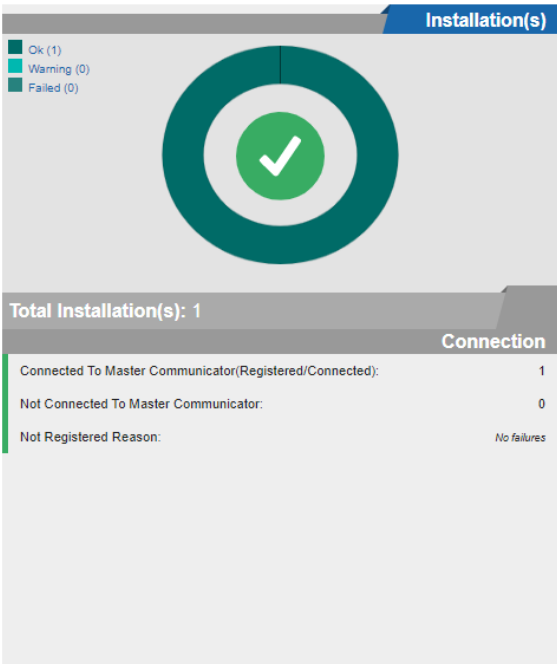

Not Connected

Vision

Mobile

What equipments are installed on the installation. To get further information click the links to go to the equipment.

Dashboard – Installation(s):

On the specific installation, it is possible to see if the mail antenna, the Communicator is online.

For license information, click on details in lower left corner.

 - Delete Display(s)
 - Set position
 - Show position

At the bottom of the display administration page it is possible to make a display batch. Push **DisplayBatch** to add, Delete, Force Update or ping either one or several displays. A text file with the display serial numbers can also be uploaded in case of many displays.

The screenshot shows a window titled "DISPLAYBATCH" with a close button (X) in the top right corner. Below the title bar, the text "BEGIN SCAN OR UPLOAD LIST OF DISPLAYS, THEN SELECT MULTIPLE ACTION." is displayed. Underneath, there is a section labeled "Upload/Select file to upload" containing a text input field and a "Gennemse..." button. Below this is a blue "Upload" button. A large grey rectangular area for displaying the list of displays is shown, containing the serial number "JB10938556B". At the bottom of the window, there is a dark bar with several buttons: a red icon button, "Add Display", "Delete Display", "Force Update", "Ping", and a "Close" button.

It is also possible to enter or scan display serial number into the great grey area and use the Add, Delete, Force update and ping buttons.

Add Display:

Use this button to add a single display by its serial number. Remember to place the display under the Master Communicator to add display(s) to be configured to the system.

The screenshot shows a window titled "ADD DISPLAY" with a close button (X) in the top right corner. Below the title bar, there is a text input field labeled "Display Serial Number". To the right of the input field, the text "This is a required field" is displayed in red. Below the input field is a blue "Save" button. At the bottom right of the window, there is a "Close" button.

New assignment:

Here it is possible to assign a single display to a product at the time. First scan or enter the display serial number and next scan or enter the product EAN number.

DISPLAYS / DISPLAY ASSIGNMENTS (BATCH)

Scan first display

Scan first display

Export Filtered List:

Choose the displays to export. Press the button and the chosen displays will be exported to a file in Excel. Here you select the displays.

Product administration:

Search and find given products among the products imported.

Jobs:

The job button shows the job page. The page can be set to auto update every 15 or 25 seconds.
The page is divided into 2 parts, The Job status and the job type.

StatusDetails shows what happens to each single display.

Clear Waiting Jobs clears the jobs.
